

Turkey Hold 'Em Official Instructions

1. Print off these instructions, the “winning hands and scoring” page, the score sheets AND the playing cards. Cut up the cards. Make sure you print them all. There are 4 suits, each with a different turkey logo. There are 2 additional pages of face cards (K,Q,J) and the “Wild Turkey” cards. You should have printed 6 card sheets for 60 cards in total.
2. Choose your dealer. That person goes around to each player one at a time. You only need this one set as each person plays individually. He deals them two cards and puts 3 cards on the table. The player uses all 5 cards to try and put together a hand that has point value. The scoring sheet you have printed explains what hands have winning points.
3. The player looks at his 2 cards and may keep them if he already has a winning hand using his 2 and the dealer 3 OR he may ask to turn in one or both of his cards for new ones. Remember Wild Turkey cards are wild cards!
4. Once those are received, the dealer then acknowledges if any points have been scored. He notes the total points on the score sheet.
5. At the end of 3 rounds (or however many you want to play) the points for each player are totaled and a winner is determined. You may also award runner up prizes.
6. **PRIZES ARE OF YOUR CHOOSING:** Cash, lottery tickets, gifts, gift cards, leftovers...whatever you want!
